Lure Improvement for GACHON Rice Moth

Dear valued customer,

We, FUJI FLAVOR CO., LTD. would like to announce that lures for GACHON rice moths is improved, effective April 01, 2018.

The male pheromone is the attractant for the improved GACHON rice moths, which the female pheromone used to be used in the previous product. Renewed GACHON will attract more rice moths with this improvement.

This change will not affect the instructions, installation, storage condition of the product.

We appreciate the support and business we've received from our royal customers over the years. Please do not hesitate to contact us if we can be of any further assistance. We look forward to meeting your pest management needs.

Sincerely,
